

Reflection Template

Use Case	UC-9
Use Case Name	Delete Task
Requirement IDs	FR10, FR20, FR22, FR23
Matching Feature Comparison Sets	CS-20
Implementation Order	Java first -> Kotlin second

Feature Relevance

Feature/s:

Extension functions

Did the feature/s occur naturally in this/these context/s?

Yes, in both extension funcs/utility methods were reused without any changes. No new features were introduced in this use case.

Qualitative Ratings (1-5)

- 1 = very poor/very difficult
- 2 = rather poor/difficult
- 3 = neutral/moderate
- 4 = good/easy
- 5 = very good/very easy

Criteria	Java	Kotlin
Readability	4	4
Compactness of logic	4	4
Perceived implementation effort	5	5

Justifications

Readability:

Both are identical in structure and equally readable. Fetch by id, delete, return nothing.

Compactness of logic:

Both are equally compact. The only consistent difference remains the call syntax between RepositoryUtils and the extension function.

Implementation effort:

Among the simplest UCs so far, if not the easiest.

Observed structural differences

No new structural differences. The extension function vs RepositoryUtils pattern remains consistent.

Both return void/unit, no meaningful difference here either.

Final comparative summary

May be the simplest UC so far and no new differences. It confirms the established patterns once more.
