

PMD + SpotBugs Results

PMD

PMD report

Problems found

#	File	Line	Problem
1	C:\Users\ASUS\OneDrive\Desktop\java-backend\java-backend\src\main\java\com\example\java_backend\exception\BadRequestException.java	3	Classes implementing Serializable should set a serialVersionUID
1	C:\Users\ASUS\OneDrive\Desktop\java-backend\java-backend\src\main\java\com\example\java_backend\exception\ResourceNotFoundException.java	3	Classes implementing Serializable should set a serialVersionUID
1	C:\Users\ASUS\OneDrive\Desktop\java-backend\java-backend\src\main\java\com\example\java_backend\service\TaskService.java	45	The String literal "Task" appears 6 times in this file; the first occurrence is on line 45

SpotBugs

Powershell:

```
PS C:\Users\ASUS> cd C:\Users\ASUS\OneDrive\Desktop\java-backend\java-backend
```

```
PS C:\Users\ASUS\OneDrive\Desktop\java-backend\java-backend> .\gradlew.bat spotbugsMain  
pmdMain
```

```
> Task :spotbugsMain
```

```
M V EI: com.example.java_backend.entity.Task.getProject() may expose internal representation by  
returning Task.project At Task.java:[line 58]
```

```
M V EI2: com.example.java_backend.entity.Task.setProject(Project) may expose internal  
representation by storing an externally mutable object into Task.project At Task.java:[line 67]
```

```
M V EI2: com.example.java_backend.entity.Task.setAssignedUser(User) may expose internal  
representation by storing an externally mutable object into Task.assignedUser At Task.java:[line 68]
```

```
M V EI2: new com.example.java_backend.entity.Task(String, String, TaskPriority, LocalDate, Project)  
may expose internal representation by storing an externally mutable object into Task.project At  
Task.java:[line 49]
```

```
M V EI: com.example.java_backend.entity.Task.getAssignedUser() may expose internal representation  
by returning Task.assignedUser At Task.java:[line 59]
```

```
M V EI: com.example.java_backend.entity.Comment.getAuthor() may expose internal representation  
by returning Comment.author At Comment.java:[line 40]
```

```
M V EI2: new com.example.java_backend.entity.Comment(String, Task, User) may expose internal  
representation by storing an externally mutable object into Comment.author At Comment.java:[line  
33]
```

```
M V EI2: com.example.java_backend.entity.Comment.setAuthor(User) may expose internal  
representation by storing an externally mutable object into Comment.author At Comment.java:[line  
46]
```

```
M V EI: com.example.java_backend.entity.Comment.getTask() may expose internal representation by  
returning Comment.task At Comment.java:[line 39]
```

```
M V EI2: new com.example.java_backend.entity.Comment(String, Task, User) may expose internal  
representation by storing an externally mutable object into Comment.task At Comment.java:[line 32]
```

```
M V EI2: com.example.java_backend.entity.Comment.setTask(Task) may expose internal  
representation by storing an externally mutable object into Comment.task At Comment.java:[line 45]
```

```
M V EI: com.example.java_backend.entity.Project.getOwner() may expose internal representation by  
returning Project.owner At Project.java:[line 34]
```

```
M V EI2: com.example.java_backend.entity.Project.setOwner(User) may expose internal  
representation by storing an externally mutable object into Project.owner At Project.java:[line 39]
```

```
M V EI2: new com.example.java_backend.entity.Project(String, String, User) may expose internal  
representation by storing an externally mutable object into Project.owner At Project.java:[line 28]
```

M V EI2: new com.example.java_backend.controller.CommentController(CommentService) may expose internal representation by storing an externally mutable object into CommentController.commentService At CommentController.java:[line 18]

M V EI2: new com.example.java_backend.controller.TaskController(TaskService) may expose internal representation by storing an externally mutable object into TaskController.taskService At TaskController.java:[line 22]

> Task :spotbugsMain FAILED

> Task :pmdMain FAILED

FAILURE: Build completed with 2 failures.

1: Task failed with an exception.

* What went wrong:

Execution failed for task ':spotbugsMain'.

> A failure occurred while executing
com.github.spotbugs.snom.internal.SpotBugsRunnerForHybrid\$SpotBugsExecutor

> Verification failed: SpotBugs ended with exit code 1.

* Try:

> Run with --stacktrace option to get the stack trace.

> Run with --info or --debug option to get more log output.

> Run with --scan to get full insights from a Build Scan (powered by Develocity).

> Get more help at <https://help.gradle.org>.

=====

2: Task failed with an exception.

* What went wrong:

Execution failed for task ':pmdMain'.

> A failure occurred while executing org.gradle.api.plugins.quality.internal.PmdAction

> 3 PMD rule violations were found. See the report at:
file:///C:/Users/ASUS/OneDrive/Desktop/java-backend/java-backend/build/reports/pmd/main.html

* Try:

> Run with --scan to get full insights from a Build Scan (powered by Develocity).
